# MODULAR SHIPPING & PREFABRICATED CONTAINER STRUCTURES

A photograph of a modern modular building constructed from dark blue shipping containers. The building features large glass windows that reveal a furnished interior with a grey sofa, a yellow cushion, and a wooden wall. A red square graphic is positioned over the top left corner of the building. The background shows green trees and a clear blue sky.

# Unique Modular Concepts

---

Our designs infuse art and engineering solutions to create modular structures that meet our clients' needs for residential and commercial living spaces.

All our structures are created to the highest engineering standards guaranteeing safety, durability and exquisite detailing of our final finished products.

# Benefits

Modular container structures offer a variety of advantages over conventional buildings

## COST

Our designs are estimated to provide a minimum of 35% cost savings over comparative brick & mortar structures.

---

## TIME

Cargotecture shaves months off construction and delivery timelines with no loss of final construct quality.

---

## ENVIRONMENT

We pride ourselves in our creation of a sustainable value chain that increases the usable life span of containers

---

## FAQ's

Quality assurance is a watchword. We meet up to the most complex projects in terms of holistic scope delivery, design integration and project duration.

### DURABILITY

Shipping & Prefab homes are created to withstand the harshest weather conditions.

They possess a minimum (zero-maintenance) lifespan exceeding 35 years.

Our protective measures guarantee over 50 years maintained span of effective usage.

---

### TEMP CONTROL

Containers transfer thermal energy directly to their insides. Prefabs are pre-insulated.

For conversion to living spaces, insulation is an unavoidable prerequisite.

We offer multiple insulation options prior to internal cladding which guarantee a cool internal temperature through all seasons.

---

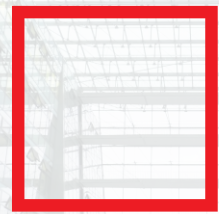

### SAFETY

All our container homes are treated, sandblasted and coated to provide multiple safety layers for our clients.

The structural integrity of all our living spaces are willfully retained to ensure resident safety for decades.

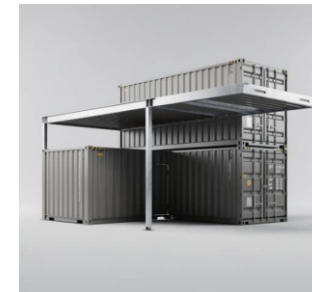

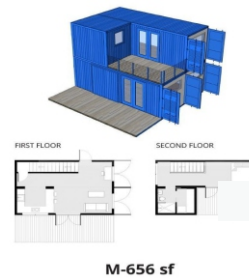

---

# Photo History

A couple of projects showcasing our depth and quality across Nigeria.
